

A measured step forward

June, 2005

Lutz - JESCO America Corporation has taken another "measured step forward" by offering accessories that will improve your system's ...

Automation

Auto Degassing System

- Autovent automatically vents metering pump head, crucial when effervescent media are metered
- Adjustable settings for venting frequency and duration

Flow Monitor

- The flow monitor FlowCon senses and alarms when the metering pump has failed to deliver the required flow-rate
- Responds in cases of reduced flow due to overpressure, system component failure or empty tank supply

Suction Lines w/Level switch

- Supports transportation of chemical from storage vessel to metering pump
- Integral foot valve keeps pump primed at all times
- Models with level switches provide an indication of supply tank low-level
