

A measured step forward™

February 2007

Dear Friends,

Lutz-JESCO America Corp., your source for Total Fluid Management™, is pleased to announce the introduction of TOPAX® Controllers.

Our TOPAX® Controllers can be used in a wide variety of applications due to their modular design. We offer four styles of TOPAX® Controllers:

- TOPAX® DX
- TOPAX® DE (1-6)
- TOPAX® L (1-4)
- TOPAX® LF (1-2)

Our TOPAX® Controllers provide the following benefits:

- All standard water parameters can be measured and controlled via direct sensor inputs or 0/4...20mA signals
- PID control function, two-sided control (i.e. metering of acid/base solution), cascade control, and disturbance-variable feed-forward is possible
- Control output can be linked to metering pumps, control valves, frequency converters or other correcting elements
- For remote monitoring or recording, a connection to PC, recorder or printer can be established

Please visit our web site at
